### Instruction Manual

Please read carefully and retain for future reference

# ACP21S

# Insect Repeller

Thank you for choosing a Vermatik Pest Control product. The Insect Repeller will help rid your home of those unwanted pests and will provide a safe clean environment for many years.

To achieve the best results from your Vermatik Pest Repeller, please read and follow the instructions carefully and retain for future reference.

## How does it work?

Emits Ultrasonic and Electro Magnetic waves to stimulate the hearing and brain nerves of the pest. The Pulse Circuitry system sends the waves throughout the cabling within the walls of your home.

The pest will feel uncomfortable in the effected area and be repelled by the noise. The product has no gas, poison, fumes or smell and no reaction to humans.

The Insect Repeller is effective for up to 30 sq meters.

## How to use your Vermatik Insect Repeller

1. Firstly, for maximum effectiveness we recommend having your repeller plugged in for 4 - 6 weeks.
2. Use ONLY in a 220 – 240V BS plug socket.
3. The Green LED light will flash on and off to show the controller is functioning.
4. Ultrasonic wave gives out 20 – 50KHz
5. For best results plug into a socket on an outside wall, preferably kitchen, entrance hall, closer to attic / loft.

Note: At 50KHz a faint buzzing sound can be heard by humans.

The frequencies emitted are safe for humans and pets. Non toxic, no chemicals, odourless.

The Vermatik Pest Repeller has been scientifically and clinically proven to work.

## Safety Precautions

- As with any electrical item, always keep away from water. Do not plug in the Vermatik Pest Repeller in an area where it could come into contact with water.

- If your Vermatik Pest Repeller should become dirty DO NOT immerse in water, simply turn off the electrics, unplug and wipe down with a slightly damp cloth. Allow to dry fully before plugging back in.

- This item is not a toy, do not allow children to play with electrical items.

- Do not disassemble the Pest Repeller, this will invalidate your warranty.

## Declaration of Conformity

We ACL Group (International) Ltd, Doncaster, England. DN6 8LZ declare that the Vermatik ACP21S Insect Repeller has been manufactured according to our full quality assurance procedures.

The declaration is to certify that it conforms to, WEEE and RoHS and EMC directives:

Mr A Garnett  
QA Manager

## Environmental Protection

RECYCLING: Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.
