## ACP51S

# Total Control Pest Repeller

Thank you for choosing a Vermatik Pest Control product. The Total Control Pest Repeller will help rid your home of those unwanted pests and will provide a safe clean environment for many years.

To achieve the best results from your Vermatik Pest Repeller, please read and follow the instructions carefully and retain for future reference.

### How does it work?

Emits Ultrasonic and Electro Magnetic waves plus infra red light waves to stimulate the hearing and brain nerves of the pest.

The pest will feel uncomfortable in the effected area and be repelled by the noise. The product has no gas, poison, fumes or smell and no reaction to humans.

The Total Control Pest Repeller is effective for up to 50sq meters.

### How to use your Total Control Pest Repeller

1. Firstly, for maximum effectiveness we recommend having your repeller plugged in for 4 - 6 weeks.
2. Use **ONLY** in a 220 – 240V BS plug socket.
3. The Green LED light will flash on and off to show the controller is functioning.
4. Double Ultrasonic wave gives out 2 frequencies:
  - a. UMI II – 22 to 40KHz - use this setting to repel most crawling & flying insects.
  - b. UMI I - 40 to 60KHz – use this setting to repel mice, rats, rodents.
5. Sweeping function constantly changes the frequency to prevent immunity.

6. Infra red function helps to repel flying insects.

7. TEST Function enables you to hear a lower version of the sound made to repel the pest. This setting shows the repeller is functioning correctly.

8. The Sensor Night Light has 3 settings.

- a. OFF: night light is always off.
- b. SENSOR: night light comes on when dark.
- c. CONT: night light is always on.

9. For best results plug into a socket on an outside wall, preferably kitchen, entrance hall, closer to attic / loft.

Note: At 50KHz a faint buzzing sound can be heard by humans.

The frequencies emitted are safe for humans and pets. Non toxic, no chemicals, odourless.

The Vermatik Pest Repeller has

been scientifically and clinically proven to work.

### Safety Precautions

- As with any electrical item, always keep away from water. Do not plug in the Vermatik Pest Repeller in an area where it could come into contact with water.
- If your Vermatik Pest Repeller should become dirty DO NOT immerse in water; simply turn off the electrics, unplug and wipe down with a slightly damp cloth. Allow to dry fully before plugging back in.
- This item is not a toy, do not allow children to play with electrical items.
- Do not disassemble the Pest Repeller, this will invalidate your warranty.
